

Appln No.10/084,631

Amdt date November 10, 2003

Reply to Office action of May 9, 2003

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A golf putting aid comprising:  
first and second attachment structures;  
an upper alignment member disposed between and attached to  
the attachment structures; and  
a lower alignment member disposed between and attached to  
the attachment structures, such that the alignment members are  
vertically aligned to define a vertical plane which is  
perpendicular to a putting surface; and  
at least one longitudinal support member disposed between  
and fixedly attached to the attachment structures.

2. (Original) The golf putting aid of claim 1, wherein the  
alignment members are flexible.

3. (Original) The golf putting aid of claim 1, wherein the  
alignment members are non-adjustable in the vertical plane which  
is perpendicular to the putting surface.

4. (Currently Amended) The golf putting aid of claim 1,  
further comprising a target removably attached to the first  
attachment structure, wherein the target has an opening which is  
centered with respect to the vertical plane, and wherein the  
opening is at least as large as a regulation size golf ball.

5-7. (Canceled)

**Amdt date November 10, 2003**

**Reply to Office action of May 9, 2003**

---

8. (Currently Amended) The golf putting aid of claim 7 1, wherein the at least one longitudinal support member is bowed downwardly towards the putting surface.

9. (Currently Amended) The golf putting aid of claim 7 1, wherein the at least one longitudinal support member is bowed downwardly towards the putting surface, such that at least a portion of the longitudinal support member is disposed lower than the lower alignment member.

10. (Currently Amended) The golf putting aid of claim 7 1, wherein the at least one longitudinal support member is compactable such that when it is desired to store the putting aid, the putting aid occupies less space.

11. (Currently Amended) The golf putting aid of claim 10, wherein the at least one longitudinal support member contains a hinge such that when it is desired to store the putting aid, the at least one longitudinal support member rotates about the hinge, such that the putting aid occupies less space.

12. (Currently Amended) The golf putting aid of claim 11, wherein the alignment members are flexible such that when the at least one longitudinal support member is compacted, the alignment members are compacted.

13-14. (Canceled)

15. (Currently Amended) A golf putting aid comprising:  
first and second attachment structures;  
an upper alignment member attached to the attachment structures; and

**Appln No.10/084,631**

**Reply to Office action of May 9, 2003**

a lower alignment member attached to the attachment structures such that the alignment members are vertically aligned to define a vertical plane which is perpendicular to a putting surface, ~~wherein at least one of the first and second attachment structures contains a pointed lower end for insertion into a putting surface; and~~

a support frame attached to the attachment structures,  
wherein the support frame comprises at least one longitudinal  
support member disposed between and fixedly attached to the  
attachment structures.

16. (Original) The golf putting aid of claim 15, wherein the alignment members are flexible.

17. (Original) The golf putting aid of claim 15, wherein the alignment members are non-adjustable in the vertical plane which is perpendicular to the putting surface.

18-28. (Canceled)

29. (New) The golf putting aid of claim 15, further comprising a target removably attached to the first attachment structure, wherein the target has an opening which is centered with respect to the vertical plane, and wherein the opening is at least as large as a regulation size golf ball.

30. (New) The golf putting aid of claim 15, wherein the at least one longitudinal support member is bowed downwardly towards the putting surface.

31. (New) The golf putting aid of claim 15, wherein the at least one longitudinal support member is bowed downwardly

**Appln No.10/084,631**

**Reply to Office action of May 9, 2003**

towards the putting surface, such that at least a portion of the longitudinal support member is disposed lower than the lower alignment member.

32. (New) The golf putting aid of claim 15, wherein the at least one longitudinal support member is compactable such that when it is desired to store the putting aid, the putting aid occupies less space.

33. (New) The golf putting aid of claim 32, wherein the at least one longitudinal support member contains a hinge such that when it is desired to store the putting aid, the at least one longitudinal support member rotates about the hinge, such that the putting aid occupies less space.

34. (New) The golf putting aid of claim 33, wherein the alignment members are flexible such that when the at least one longitudinal support member is compacted, the alignment members are compacted.

35. (New) The golf putting aid of claim 15, wherein the support frame is substantially rectangular shaped.

36. (New) The golf putting aid of claim 35, wherein the support frame comprises:

a first lateral support connected to the first attachment structure;

a second lateral support connected to the second attachment structure;

a first longitudinal support disposed between and connected to the first and second lateral supports; and

**Appln No.10/084,631**

**Amdt date November 10, 2003**

**Reply to Office action of May 9, 2003**

a second longitudinal support disposed between and connected to the first and second lateral supports.

37. (New) The golf putting aid of claim 36, wherein the first and second longitudinal support members each contains a hinge such that when it is desired to store the putting aid, each longitudinal support member rotates about its corresponding hinge, allowing the putting aid to occupy less space.
